JAGATH K R

🌍 Full Stack Software Engineer | Fintech Innovation | System Design & Scalable Architecture | AWS Cloud & DevOps | AI & ML Solutions ,AI Agents Expert

jagathramesh30@gmail.com | 9894884605 | Greater Bengaluru Area

SUMMARY

👋 Hi, I'm Jagath K R, a passionate Data Engineer with a mission to convert raw data into actionable insights. I thrive on designing data pipelines, optimizing databases, and creating meaningful data models.💻🌐 Full Stack Developer 🚀 | Crafting Digital Experiences

WORK EXPERIENCE

Associate Software Engineer, NASHZERO
Mar 2026 - Present
Bengaluru, India

Associate Software Engineer, NashZero, Bengaluru | Mar 2026 – present

• Own the backend and AI integration for a SaaS platform for sustainable architecture.

• Built AI agent workflows that turn plain-language building briefs into editable 3D massing models, similar to Snaptrude.

• Built an ETL pipeline that loads 30 TB of EnergyPlus simulation data for every city into Apache Cassandra, so building energy analysis returns results instantly instead of re-running simulations.

• Designed the backend services and APIs in Node.js and Python that connect the design studio, the agents and the energy data.

• Work with design, product and architecture specialists to ship features from idea to production, with code reviews and automated tests.

Software Developer, KESS
Nov 2025 - Mar 2026
Singapore

- Developed responsive web applications using React.js, Node.js, TypeScript, and JavaScript to support scalable software development initiatives.
- Built and integrated RESTful APIs with Node.js, Express.js, and NestJS, strengthening server-side functionality and application interoperability.
- Implemented data-loading workflows and SQL-based integrations with MySQL and Amazon RDS to support reliable application data management.
- Collaborated in Agile project management environments, applying Git-based version control, problem-solving, and teamwork to deliver software enhancements within a four-month engagement.

Software Engineer, FinfoLab Technologies LLP
Dec 2023 - Oct 2025
Bengaluru, India

- Engineered scalable front-end applications using React.js, Angular, Vue.js, TypeScript, JavaScript, HTML5, Redux.js, and Next.js, translating Front End Engineering Design (FEED) requirements into responsive user experiences.
- Developed and integrated RESTful and GraphQL APIs with Node.js, NestJS, Express.js, Python, Django REST Framework, and SQL databases, supporting reliable data loading and business workflows.
- Automated software development, testing, and deployment pipelines using Docker, Kubernetes, Jenkins, Terraform, AWS CloudFormation, AWS CLI, and Linux, improving release consistency and cloud infrastructure reliability.
- Collaborated in Agile project management environments to deliver cloud-based solutions across AWS services, including EC2, S3, RDS, Lambda, IAM, Elastic Beanstalk, and Redshift, reducing deployment cycle time by 30% and increasing application reliability by 25%.

Programer analyst trainee, Cognizant
Mar 2023 - Aug 2023
Chennai, India

project aims to create an end-to-end data pipeline using AWS services for Extract, Transform, and Load (ETL) processes. It will leverage AWS Glue for ETL, Amazon S3 for data storage, AWS Lambda for data triggers, and AWS CloudFormation for infrastructure as code.

EDUCATION

Bachelor of Engineering - BE in Computer Science, Muthayammal Engineering College — **Jan 2019 - Jan 2023**

SKILLS

- Data Loading, Agents, Agile Project Management, Node js, AWS Elastic Beanstalk, AWS Command Line Interface (CLI), Amazon EC2, AWS IoT, AWS CWI, Docker, oracle ai, HTML5, Server Side, NestJS, .NET Framework, Vue.js, Trading Systems, Angular, MERN Stack, Express.js, Django REST Framework, Django, TypeScript, Machine Learning, GraphQL, Redux.js, Jenkins, Software as a Service (SaaS), Teamwork, SQL, Ansible, Front End Engineering Design (FEED), Node.js, MySQL, Next.js, API Development, Front-End Development, Cloud Infrastructure, Cloud Services, Data Architects, AngularJS, JavaScript, Platform as a Service (PAAS), Data Mining, Computer Science, Cloud Computing, Python (Programming Language), Google Cloud Platform (GCP), Organization Skills, English, Cloud Security, Infrastructure as a Service (IaaS), Linux, Shell Scripting, Docker Products, Kubernetes, Build Automation, Reliability, Programming Languages, Coding Experience, Problem Solving, Amazon S3, Version Control, Selenium WebDriver, Selenium Testing, Selenium, AWS Identity and Access Management (AWS IAM), Terraform, Container Orchestration, Test Automation, Software Development, Amazon Relational Database Service (RDS), Identity & Access Management (IAM), AWS Lambda, AWS CloudFormation, HTML, Dsa, React.js, Java, Google data analytics, Analytical Skills, DevOps, Amazon Redshift, Engineering, Communication, Microsoft Excel, Strategy, Finance, Business, Data Analysis, Statistical Data Analysis, Amazon Web Services (AWS)
